9" Paper Pieced Daffodil Pattern

©Kohatu Patterns 2018

Thanks for purchasing a Paper Piece Quilt Pattern from Kohatu Patterns!

This Pattern consists of 10 pages including:

- Pattern Notes
- Right Facing Design Template (pg 5)
- Daffodil Pattern Templates (pg 6-7)
- Left Facing Design Template (pg 8)
- Daffodil Pattern Templates (pg 9-10)

The Daffodil pattern consists of 7 sections which need to be sewn together.

A Diagram detailing the layout of the pieces is included, as are numbers showing the order for each new section of fabric to be sewn on. All the finished sections include seam allowances. Please remember that the diagram and pieces are a mirror image of your finished block!

Construction:

The pattern pieces should be joined together in the following order for ease of construction.

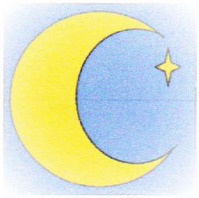
1. First, determine your colour scheme and sew your fabric to each numbered section within the paper pieces, for example A1, A2, A3, and so on.
2. Join section C and D together.
3. Attach Section A to CD
4. Attach Section B and then put the ABCD section to one side.
5. Attach Section E and F
6. Attach Section EF to G
7. Join sections ABCD and EFG together to complete the 9" block.

Printing

IMPORTANT: When printing this pattern ensure that your printer settings print "actual size" and do not "shrink to fit".

To ensure the pattern size is accurate, please ensure the following image is 1 inch or 2.54cm after printing.

©Kohatu Patterns 2018



Increasing or decreasing the size of the pattern is possible by photocopying at the following percentages:

6"	66%
12"	133%
18"	200%

It should be noted that some of the numbered sections are very small and reducing the size may result in a loss of detail in the finished product or difficulty in accurately sewing the pattern.

About Paper Piecing:

Paper piecing is the technique of sewing fabric to a paper foundation in order to achieve very precise results. The foundation paper should be removed later or alternatively, it is possible to purchase foundation fabric from craft stores which can be left in position after the project is completed.

Paper pieced patterns are usually small and give you the opportunity to use up your small scraps leftover from other projects.

There are many good tutorials online to help you as you learn the Paper Piecing Technique.

Tips:

Ensure you use a shorter stitch length (1-1.5). This will help to perforate the paper and make it easier to remove. Shorter stitch length will also give you a nicer finish on the final product.

Trim excess fabric and press seams after each piece is added for a neater finish.
